

## Bruce Hellman, CEO umotif

Maheen worked with umotif as a data scientist, analysing data captured by patients in the 100 for million data points. Her work included the analysis of usage rates, comparisons of data between patients with and analyse data sets.

successful in identifying new patterns in the data, and producing analysis that was shared with the study participants through engaging data visualisations.

She worked independently where necessary, progressing her thoughts, learning and work. She was als
